Barrios Peña, Fabiana F.

Barrios Peña, Fabiana F. 16 days ago I gave Mrs. Jo-An a brief introduction to what i had been starting to work on for my project X. My original idea was to focus the project on redesigning Pupioys website and overall brand. The teacher suggested i check my portfolio and see what i aspects i needed to work on a bit more, so i did that and wanted to add more into LO2 & LO4 so, the idea will stay the same for the project but it will be more focused on the user research and web development part more, rather than the actual design iterations (which will still be there but aren't the main focus). Overall, Mrs.Jo-An was content with my idea and project plan so far. Write a summary of what you discussed with your teacher...

Checkpoint 6 feedback on portfolio 05-04-2024

Barrios Peña, Fabiana F. 2 months ago

I showed Mrs Jo-an my portfolio and i specifically asked her about the structure and layout of the learning outcome popups as yesterday there was a bit of confusion from Mr.Guidos part. She also suggested to add bullet points and have the same text structure for each popup (for example have the summary of the project in bold text). She also emphasized the importance of showcasing the pictures i included and make them the protagonist of the popup rather than having too much text. Overall she said the design was very creative and simple to understand.

Checkpoint 5 04-04-2024

Barrios Peña, Fabiana F. 2 months ago

My group and i had the first review for our portfolio progress. My design was very simple as i have been working more on the structure, layout and overall content regarding the learning outcomes. I have several design ideas layed out in figma but none of them really stand out to me so i opted to keep on working on other things instead of getting stuck with colors and other visual elements. On one hand Mrs.Li really liked my structure and said there was a great balance between images/proof of the work ive done and text and very clear on what project belonged to what L.O. In contrary, Mr.Guido was very confused on the project layout for the L.O, he mentioned it was all over the place and not clear enough. As these are 2 very different and opposed to eachother my plan to keep working on the portfolio is to ask other teachers as well as classmates for more perspectives on the matter.

Checkpoint 4 20-03-2024 **□**

Barrios Peña, Fabiana F. 3 months ago

Mr.Jan commented on how the colours dont really work together visually as the yellow is very light and pastel, bright and the blue has a grey undertone. Overall layout was nice although in the learning outcomes popup he suggested not so much text but more visuals. Also he liked the combination of scrolling vertically and horizontally in the L.O section but said to make it clear to the user. Finally, to change the sad grey he suggested Adobe color and try to find a warmer blue within the picture i have in the front page, if that doesnt work maybe consider changing the colors

Checkpoint 3 Chris portfolio 15-03-2024

Barrios Peña, Fabiana F. 3 months ago

I spoke to Mr. Chris and he said he liked my new design overall. The Home page was inconsistent with the other pages so try to make it more even. He emphasized he really enjoyed the layout for the learning outcomes section, although he said all of the content i wanted to add to the popups regarding each L.O was not going to fit and consider making the popup scroll. I also mentioned I wanted to add a horizontal scroll for the learning outcomes (but the rest of the website would have vertical scroll), so before putting it in code, make the figma prototype as "the final result" as possible and user test it with other students and ask for their opinion.

Barrios Peña, Fabiana F. 3 months ago

I talked to Mr.Guido and he emphasized the importance of displaying the learning outcomes and give them the most importance. Also add proof of the learning outcomes, projects (doesnt matter if the proof is repeated because there are several learning outcomes.) Color-scheme looks nice and overall design looks cool.

Checkpoint 1 13-03-2024 **□**

Barrios Peña, Fabiana F. 3 months ago

I spoke to Mr.Jan and he told me my portfolio had nice details but suggested some changes I should make. Firstly, the project and learning outcomes section should be organized in a different way (either showcase the projects and create a section for the correspondent learning outcomes or showcase the learning outcomes and add the projects that match.) Both have their challenges but I need to find a way to make it work. Also the gradient cards are too much for the eye and make the text hard to read so either try a different approach or make it work by maybe adding the gradient animation only to the edges. He emphasized how the general design was really nice and it was very personalized to fit me.
